

I wish to give my opinion on the telephone privacy issue. As an Indiana resident I do not want it changed. We used to get close to 15 solicitation calls a day, and now we might get a couple a week. If I want a service I will call these people rather than having my lif constantlly disturbed by them. We in Indiana voted to have this law, and it should be up to each state to do the same. Our law should not be preempted because of what the FCC feels. Please do not change the law. It has been nice not having to listen to the phone ring, and then run to answer it just to find out it's someone selling something that I don't want anyway.

Thank you for your time.
